

## ABSTRACT OF THE DISCLOSURE

A reinforced pallet assembly having a first pallet deck and a second pallet deck. Each of the decks has an outer member and an intermediate member, each outer member and intermediate member having a one of a pair of mating cross-rib surfaces which are mounted together to define box-beam sections within each pallet deck. Also included is an elongate reinforcement member which is disposed between the outer member and the intermediate member of the second pallet deck for providing stiffness thereto. Further included is a plurality of columns which extend between the intermediate members.
